PROFESSIONAL SUMMARY

Career-changing creative problem solver with electronic engineering foundation, 14+ years operations leadership, and rapid AI-assisted development skills. Built React web apps deployed on Vercel using Google AI Studio and OpenWork Agent, transforming complex trading workflows into intuitive tools in days. Eager to apply systems thinking and fast prototyping to full-stack development challenges.

TECHNICAL SKILLS

Languages & Frameworks: React, JavaScript, HTML/CSS, Basic Python

Development & Deployment: Vercel, Netlify, GitHub, Git, Responsive Design

AI & Automation Tools: Google AI Studio, OpenWork Agent (OpenCode), LLMs (Gemini, Perplexity, Grok, Qwen)

Key Competencies: Fast prototyping (prompt to deployed in hours), API integration, UI component development, Responsive web design

---

SOFT SKILLS

Problem-solving | Fast Prototyping | Stakeholder Collaboration | Team Leadership (managed 26-person team) | Process Optimization | Project Management | Agile Mindset | Communication | Adaptability

---

🚀 VIBE CODING PORTFOLIO & PROJECTS

Live Web Apps (Deployed on Vercel)

1. Trade Position Calculator | https://tradesizer.vercel.app

- Problem: Traders manually calculate position sizes in spreadsheets, losing precious seconds during live markets
- Solution: Built React-based calculator that instantly computes optimal position size based on risk parameters
- Technical Stack: React, Google AI Studio (core logic generation), Vercel deployment
- AI Workflow: Used Google AI Studio to generate and validate mathematical logic, drafted UI components; I refined, tested, and deployed
- Result: Reduced calculation time from minutes to seconds; live demo shows real-time UX

2. Candle Catcher | https://candlecatcher.vercel.app

- Problem: Traders struggle to spot candle patterns visually, especially during fast-moving markets
- Solution: Interactive visual helper with neuomorphism UI design for pattern recognition and learning
- Technical Stack: React, Responsive design, Google AI Studio (UI suggestions), Vercel
- AI Workflow: AI generated layout ideas and color schemes; I manually iterated for responsiveness and polish
- Result: Clean, accessible interface demonstrating UI/UX principles in a functional trading tool

Prototypes & In-Progress Projects

3. Virtual Try-On Web UI Prototype

- Concept: Interactive mockup for virtual try-on experiences (fashion, accessories, lifestyle)
- Technical Stack: React, Figma (design phase), responsive layout
- AI Workflow: Generated UI variations, copy, and mood boards with LLMs; iterated on user-friendly flows
- Note: Proof-of-concept; market has many similar projects, but demonstrates full prototyping workflow

4. Spot the Difference — YouTube Shorts Automation Pipeline (In Progress)

- Concept: Semi-automated pipeline generating "spot 5 differences" game videos for YouTube Shorts

- Technical Stack: Midjourney/Nano Banana (image generation), flux-schnell, automation scripting (n8n/Make.com)
- AI Workflow: Prompt engineering for AIGC, semi-auto video editing, scheduling
- Learning Focus: Content automation, prompt engineering, workflow design
- Status: Currently testing content quality and engagement metrics

---

PROFESSIONAL EXPERIENCE

Legislative Council Secretariat 立法會秘書處 | Aug 2011 – Dec 2025

Public Information Officer (Jun 2014 – Dec 2025)

- Managed operations of Legislative Council Souvenir Shop (production, inventory, procurement), overseeing multiple business workflows and cross-departmental coordination resulting in streamlined processes and improved inventory management efficiency
- Led and mentored a team of 26 frontline staff, providing training, scheduling, and resource allocation to ensure consistent service quality; implemented roster optimization process that reduced last-minute scheduling conflicts by ~30%
- Coordinated with internal and external stakeholders to resolve financial reporting and procurement issues, ensuring timely resolution and adherence to budgetary constraints; handled complex reconciliation tasks across multiple systems
- Planned and executed souvenir promotion campaigns, analyzing market trends and customer feedback to drive product decisions and improve sales performance
- Streamlined team administration processes including roster planning, manpower deployment, and uniform production; reduced administrative overhead by automating tracking and reporting

Educator & Programme Developer (Aug 2011 – May 2014)

- Designed and delivered engaging educational programmes to diverse audiences (kindergartens, schools, youth groups), tailoring content to specific learning objectives
- Conducted storytelling and interactive sessions that improved audience engagement and feedback scores
- Collaborated with multiple departments to plan, resource, and execute public programmes
- Managed administrative tasks including budget tracking, vendor coordination, and programme evaluation

Teaching Experience

Yeo Chei Man Senior Secondary School | Sep 2005 – Aug 2011 (Graduate Master III)

- Taught F.4 & F.5 Mathematics; elective Drama module for F.5 Chinese Language
- Advisor of Drama Club, Class Tutor; Head of SLP (09–10), Deputy Head of OLE (08–09)
- Designed curriculum materials that made complex mathematical concepts accessible to diverse learners
- Mentored students in both academic subjects and personal development

Buddhist Ho Nam Kam College | Sep 2003 – Aug 2005 (Graduate Master)

- Taught F.1 & F.2 Mathematics to 150+ students across multiple classes
- Class Tutor, Drama Club Advisor
- Developed teaching materials and assessment strategies

Other Educational Roles

- Caritas Eastern District Community Education Centre | Oct 2008 – Jun 2009: Maths tutor (Part-time) — Yijin Project
- Kowloon West PHAB Centre | Mar 2001 – Apr 2001: Computer class lecturer (Part-time) — IT basics for students with disabilities

---

EDUCATION & CERTIFICATIONS

Master of Fine Arts (Drama and Theatre Education)

Hong Kong Academy of Performing Arts | Graduated Jun 2014

Postgraduate Diploma in Education (Computer Studies)

Hong Kong Baptist University | Graduated Jul 2003

Bachelor of Electronic Engineering

The Chinese University of Hong Kong | Graduated Jul 2002

Secondary Education
Sing Yin Secondary School | Form 1–7 (1991–1998)

PUBLIC EXAMINATIONS

HKALE: 1B2C | HKCEE: 6B2C

ADDITIONAL INFORMATION

Expected Salary: HK$30,000/month (negotiable based on role and location)

Availability: Immediate

Languages: English (fluent), Cantonese (native), Mandarin (conversational)

Portfolio Note: All live projects at

https://yourname.dev

; source code available on GitHub. Continuously updating with new vibe-coding experiments and automation projects.
